## Profile

Backend Developer with experience in JavaScript, Node.js and PostgreSQL, comfortable working with frameworks and tools such as React, Next.js, Nest.js, Sequelize, PostgreSQL, SLite, and Prisma. Advanced version control management with GIT and GitHub, as well as agile methodologies like Scrum. Passionate about logic, planning, and organization, I seek an environment that allows me to develop professionally, with stability and opportunities to maximize my potential.

## Technical Skills

### Core Skills:

JavaScript - Node.js - Express - PostgreSQL - Prisma  
HTML - CSS - Sequelize - Postman

### Additional Experience:

React - Next.js - Nest.js - TypeScript - C#  
TailwindCSS - Supabase - Neon- SQLite

## Professional Experience

### Code Analyst - Remotasks (Dec 2023 - Present)

- Analyzed AI-generated code, focusing on quality and functionality.
- Reviewed responses related to web development to ensure technical accuracy.

### Freelance Full Stack Developer - DayZ Community (Jul - Aug 2024)

- Designed and developed the original web platform for a DayZ gaming community using React.js.

-Managed dynamic game-related data and implemented user-facing features based on client needs.

### Freelance Full Stack Developer - DayZ Community (Jul 2025)

- Hired again by the same client to build a completely new version of the platform, this time including full e-commerce capabilities using Next.js and Neon.

-Rebuilt the site from scratch, reimplementing previous features and integrating new admin tools, PayPal payments, and Steam login.
