Sergio Ferrari Bryce

Full Stack Developer

+54 9 11 3504 0982 • CABA, Argentina • ferrari8986@gmail.com

linkedin.com/in/sergiofb • github.com/Kyriokes • portfoliosergiofb.vercel.app

Full Stack Developer (React, TypeScript, Next.js, Node.js, PostgreSQL) who ships complete products fast, working with AI tools. Built KeyWords, a job search platform with several AI APIs, CV-to-posting matching and an MCP agent workflow. I handle the full cycle: architecture, backend, frontend, authentication and deploy. English C1.

FEATURED PROJECTS

KeyWords · *Next.js · TypeScript · Prisma · PostgreSQL (Supabase) · NextAuth · MCP* kwtools.vercel.app

- Job search platform I built alone, end to end. A daily cron pulls postings from several job boards and scores them against my CV; an LLM drafts the cover letter.
- MCP server that lets Claude Code fill in application forms and record every answer.
- Unified AI controller with feedback-weighted selection across Groq, Gemini, DeepSeek, OpenRouter, Mistral and Cohere, with Ollama (local) as fallback. Per-user quotas and NextAuth authentication.

Bastardos DayZ · *Next.js · TypeScript · Prisma · PostgreSQL · Steam API · PayPal* Real client

- Full stack e-commerce for a gaming community: Steam login, digital product catalog, PayPal payments and gifts between users.
- Complete admin panel (items, purchases, users, permissions) and live player stats from game APIs.

AOE2 Build Order Coach · *.NET 10 · OCR · Supabase (PostgreSQL + Auth)* aoe2-bo-coach.vercel.app

- Age of Empires II overlay that reads the screen, follows a build order and adapts when the player deviates.

WORK EXPERIENCE

Full Stack Developer (Backoffice) · *Instituto de Ayuda Financiera (IAF), Argentina (On-site)* 07/2026 - Present

- Payroll system (VB.NET, SQL, ASPX; ~500 employees): as a team, we revived the legacy system and validated the payroll item calculations. The new system now runs in parallel with the previous one.
- Security: identified an access-control flaw across modules in the legacy system and reported it to the team. The fix was deferred to the new system.
- Investment scenario simulator for the board, with user-defined assumptions.
- Local LLM integration (Ollama): cut request time from 6 minutes to 20 seconds, keeping code inside the institution.

Full Stack Developer · *Freelance, Argentina (Remote)* 06/2023 - Present

- Web platforms for clients with React, Next.js, Node.js, TypeScript and PostgreSQL: REST APIs, admin panels, Prisma. End-to-end: planning, documentation and delivery.

AI Code Analyst · *Remotasks, Remote* 12/2023 - 03/2026

- Analysis and correction of AI-generated code in JavaScript, HTML and CSS. Best practices and quality standards.

Technical Mentor - Full Stack · *Henry Bootcamp, Remote* 03/2023 - 07/2023

- Selected among 300+ candidates. Mentored 18 students in JS, React, Node.js and databases. 90% graduation rate.

Earlier: Administrative, Moverart Group (2021-2023) · Civilian Staff Supervisor, Argentine Air Force (2012-2020)

TECHNICAL SKILLS

Frontend: React · Next.js · TypeScript · JavaScript · Redux · Zustand · Tailwind CSS · HTML · CSS
Backend: Node.js · Express · NestJS · RESTful API · NextAuth · JWT · .NET (VB.NET, C#) · ASP.NET Web Forms
Databases: PostgreSQL · Supabase · SQL Server · MySQL · SQLite · Prisma · Sequelize
Tools: Git/GitHub · Docker · Vitest · Postman · Scrum · AI coding tools (Claude Code) · MCP · LLM APIs
Infrastructure: Vercel · CI/CD · Microservices
Languages: English C1 · Spanish (native)

EDUCATION

Information Systems Engineering, UTN · 2020 - Present (in progress)
Full Stack Web Developer, Henry Bootcamp · 2023 · Outstanding Graduate
Courses: SQL, JavaScript, React (LinkedIn Learning, 2024)
