Full Stack Developer with a stack in React, TypeScript, Next.js, Node.js, and PostgreSQL. Built KeyWords, a personal platform integrating multiple AI APIs, a feedback-based ranking system, and ATS analysis of CVs against job listings. Handles the full cycle: architecture, backend, frontend, authentication, and deployment. Team experience alongside senior developers on an active project. C1 English.

FEATURED PROJECTS

KeyWords — Personal Project | kwtools.vercel.app

Next.js · TypeScript · Prisma · PostgreSQL · NextAuth · APIs de IA · Zustand · Recharts

- Extracts keywords from job listings, cross-references them with the user's CV, and generates ATS match statistics to visualize real gaps.
- AI provider system with weighted ranking by feedback: each acceptance/rejection adjusts the provider weight automatically.
- Server Actions, per-user quota control, NextAuth authentication, and serializable error handling for the UI.

Bastardos DayZ — Real Client (gaming e-commerce)

Next.js · TypeScript · Prisma · PostgreSQL · NextAuth · Steam API · PayPal

- Full stack e-commerce: Steam authentication, digital product catalog, PayPal payments, and gift support between users.
- Full admin panel: CRUD for items, purchase management, users, permissions, and dynamic site content.
- Leaderboard and integration with external game APIs to display player statistics and profiles in real time.

Booking System — Team Project (NDA)

Next.js 15 · React 19 · TypeScript · Tailwind CSS · JWT

- Full frontend: JWT authentication with httpOnly cookies, registration/verification flows, and mock-first architecture to decouple UI from backend.
- Dashboards, complex forms, and reusable component system. Team of senior developers.
